

As part of the company's Sustainability Plan, Línea Directa Aseguradora, in addition to being committed to improving energy efficiency and reducing consumption, also pays special attention to waste management.

Línea Directa Aseguradora is committed to sustainability and the circular economy, integrating environmental criteria into its waste management operations, as can be seen in the following table. More than 80% of the Group's waste is integrated into reuse, recycling, or recovery processes

Linea Directa presents waste management and recovery data from 2021 to 2024

Waste management				
	2021	2022	2023	2024
Total waste (kg)	107.882	112.042	113.967	150.241,61
Hazardous waste (kg)	35.715	40.435	40.059	83.826,61
Non Hazardous waste (kg)	72.106	71.608	73.908	66.415
Paper and cardboard (kg)	14.839	17.898	21.915	23.849
Plástico (kg)	16.976	14.010	18.777	34.912
Other non hazardous waste (kg)	40.291	39.700	33.216	7.654
Waste recovery				
	2021	2022	2023	2024
Recycle /reused waste (kg)	97.332	81.156	82.844	124.388,61
Discarded waste (kg)	0	0	10.499,2	0
Waste sent to landfill (kg)	0	0	0	3.717
Incinerated waste (with or without recovery (kg)	0	20.202	19.044	1.209
Waste otherwise disposed of (kg)	0	0	1.277	20.927
Wastre with unknown disposal method (kg)	10.490	10.684	303	0

Within the Linea Directa group, the activities with the greatest waste generation and impact are the high-performance centers (CAR).

With the objective of reducing waste generation and increasing the reuse, recycling or other recovery of the waste produced. **CAR Madrid** earned the **“Zero Waste” certificate**, which confirms that more than 90% of the waste generated by the workshop is treated for recovery; and **CAR Barcelona** earned the **“Towards Zero Waste”** certificate, which indicates that more than 60% of the waste produced as a result of production activity has undergone recovery treatments
